

DARK WEB

Game Design Document & Executive Pitch (GDD - With Visual Assets)

Project Status: Concept / Pre-Production

Target Platform: Mobile (iOS & Android) — Scalable to PC/Console

Genre: Adventure • Mystery • Puzzles • Story-driven Co-op

Business Model: Free-to-Play + In-App Purchases (IAP)

1. EXECUTIVE SUMMARY & NARRATIVE HOOK

DARK WEB is an immersive mystery-adventure game set within a dark, fictional digital ecosystem. The game blends tense single-player narrative beats and role-based cooperative multiplayer.

You start at a terminal. Select your rank. Select your avatar. Then, the screen flashes. Your digital world is shattered. You are abducted. Not by programs, but by two enigmatic figures—a Plague Doctor and a Skeletal entity—who bring you to an abandoned factory. They reveal the truth: You aren't the mastermind; you are the victim.

2. VISUAL CONCEPT & ART DIRECTION (KEY ASSET #1)

The visual direction of **DARK WEB** blends gritty urban decay with crisp, authentic digital interfaces. Below is the primary concept art illustrating the main cast and the environment of the abandoned factory scene.

PRIMARY CONCEPT ART: "YOU ARE BEING WATCHED"

Features: Faction Logos ("Cybernetic Realms"), the central terminal, and the three main characters (Hacker, Plague Doctor, Skeleton entity). Note the ominous screen: "You are being watched."

3. GAME TEASER / CINEMATIC SHOWCASE (KEY ASSET #2)

While the image captures the scene, the cinematic video link below demonstrates the narrative takeover—the moment the Plague Doctor and Skeleton figures breach the terminal security and drag the user into the factory.

CONCEPT TEASER TRAILER

Watch the cinematic vertical slice illustrating the terminal-to-abduction sequence:

4. CORE GAMEPLAY LOOP & PROGRESSION

PHASE	GAMEPLAY MECHANICS & PLAYER EXPERIENCE
1. Terminal Gateway	Realistic terminal interface for onboarding. Players register credentials and select hacker rank.
2. Narrative Hook	Abducted by enigmatic female hackers to an abandoned factory—revealing the player is the victim.
3. First Investigation	Tactile discovery of clues (laptops, phones) and receiving the ominous call: <i>"You are being watched..."</i>
4. Virtual World Exploration	Navigating forums, encrypted nodes, and secret digital sectors.
5. High-Stakes Heists	Executing cooperative missions (e.g., Fictional Bank Breach), ranking up, and unlocking advanced clearance.
